Mirpur-1, Dhaka, Bangladesh

CAREER OBJECTIVE

Motivated full-stack developer skilled in React.js, Next.js, Node.js, and MongoDB, with hands-on experience shipping production-level platforms like StartupForge and Wanderlust. Seeking a full-stack or frontend role at a growth-driven startup where I can bring fast execution, end-to-end ownership, and a strong foundation in modern web architecture to real-world products.

TECHNICAL SKILLS

- **Programming Languages:** C, C++, JavaScript (ES6+), TypeScript, Java
- **Frontend:** HTML5, CSS3, Tailwind CSS, React.js, Next.js
- **Backend:** Node.js, Express.js, RESTful APIs, JWT, Better Auth
- **Database:** MongoDB, Mongoose, MongoDB Atlas
- **Libraries & State Management:** TanStack Query, React Hook Form, Zod, Recharts, Framer Motion
- **Payments & Auth Services:** Stripe, Firebase Authentication
- **Tools & Platforms:** Git, GitHub, VS Code, Firebase, Netlify, Vercel, Chrome DevTools

WORK EXPERIENCE

Next.js Developer Intern | Shop Online New York (Remote)

June-2026-Present

- Integrated the admin dashboard frontend with backend-provided REST APIs, ensuring accurate data flow and reliable rendering across dashboard modules.
- Identified and resolved frontend bugs across dashboard views, improving stability and consistency of the admin interface.
- Collaborated closely with backend and product teams in a real-world, fast-paced development environment, strengthening team communication and delivery workflow.

PROJECTS

StartupForge - Startup Team-Builder & Co-Founder Matching Platform | [Live Link](#) | [GitHub Client](#) | [GitHub Server](#)

Developed a full-stack platform that connects startup founders with skilled collaborators by enabling founders to post ventures and recruit co-founders/team members, while giving contributors a streamlined way to discover and join promising startups based on skills and interests.

- Founders can create and manage startup listings and track applicants through an interactive dashboard with visual analytics, giving real-time visibility into team-building progress and applicant activity.
- Smart validation ensures clean, accurate data submission across startup creation, applications, and profile updates, preventing incomplete or invalid entries from reaching the database.
- Secure authentication and role-based access control protect user accounts and sensitive actions, ensuring only verified founders and collaborators can manage listings or applications.
- Integrated payment handling enables smooth processing of premium features and transactions, giving users a secure and frictionless upgrade experience.

Tech Stack: Frontend: Next.js 16, React 19, Tailwind CSS, HeroUI, Framer Motion | Backend: Node.js, Express.js, JWT, Better Auth | Database: MongoDB | State/Forms: TanStack Query, React Hook Form, Zod | Payments & Data Viz: Stripe, Recharts

Wanderlust – Tour Booking Platform | [Live Link](#) | [GitHub Client](#) | [GitHub Server](#)

A production-level travel e-commerce platform designed to streamline tour exploration and reservations, providing travelers with a frictionless experience from destination discovery to final booking.

- Delivered a highly secure, permission-based profile environment, ensuring travellers maintain complete privacy and control over their sensitive personal and booking data.
- Streamlined the trip discovery and reservation process, enabling users to effortlessly explore destinations and customize tour bookings for specific dates and group sizes.
- Empowered users with a centralized travel dashboard to instantly track active itineraries, review past journeys, and monitor total travel expenditures in real time.

Tech Stack: Frontend: Next.js, React, Tailwind CSS, DaisyUI, HeroUI | Backend: Next.js API Route Handlers, Better Auth | Database: MongoDB, MongoDB Atlas | Others: Vercel, ESLint, PostCSS

EDUCATION

- B.Sc. in Computer Science & Engineering | Eastern University | CGPA: 3.67 | 2025 - Present
- HSC | Science | Sirajganj Govt. College | GPA: 5.00 | 2023

CERTIFICATIONS

- Prompt Engineering Professional Certification – AICerts [[Certificates](#)]
- Data Structures & Algorithms Course Completion – Phitron [[Certificate](#)]
- AI Driven Full Stack Development – Programming Hero

LEADERSHIP

- Executive Member – Eastern University Computing Club (EUCC) | Assist in organizing programming contests and Seminar.
- Competitive programming – Pupil at CodeForces | 3* Coder at CodeChef | 350+ Solved in Leetcode

LANGUAGES

Bangla – Native | English – Fluent
